FASHIONABLE FINERY.

The front panel is quite the newest thing in skirts. Most of the small hats are tricornes

or boat-shaped turbans. The crown is quite distinct from the

brim in the new turbans. Tulle is one of the latest trimming ideas and is used in great quantities. Ribbon of two contrasting shades is

very smart for trimming tailor hats.

Coq de roche is most effective as a relief note with gray-green and brown. Not for years has the separate wrap been such an important feature of dress. The plush coat, put away years ago. is to make its reappearance this winter,

Aigrettes are to be much worn and are of spangled and jetted tulle for turbans. Lovely poke bonnets trimmed with ostrich tips are shown for wee maidens. Lots of fire brown and spinach green will be exploited in panne velvet and net.

This new "yetta" skin is not nearly so becoming as the soft, long-haired furs.

It would be difficult not to find at least one becoming color in the approved list. As long as big sleeves remain in vogue

the short cape garment will be to the

Toques made of velvet leaves and fruit are very modish, particularly the vine and leaves of the muscatel grape.

"WHACKS"

And What They Mean.

When Old Mother Nature gives you a "whack," remember "there's a reason," so try and say "thank you," then set about finding what you have done to demand the rebuke, and try and get back into line, for that's the happy place after all.

Curious how many highly organized people fail to appreciate and heed the first little, gentle "whacks" of the good old Dame, but go right along with the habit, whatever it may be, that causes her disapproval. Whisky. Tobacco, Coffee, Tea or other unnatural treatment of the body, until serious illness sets in or some chronic

Some people seem to get on very well with those things for awhile, and Mother Nature apparently cares but little what they do.

Perhaps she has no particular plans for them and thinks it little use to waste time in their training.

There are people, however, who seem to be selected by Nature to "do things." The old Mother expects them to carry out some department of her great work. A portion of these selected ones oft and again seek to stimulate and then deaden the tool (the body) by some one or more of the drugs-Whisky, Tobacco, Coffee, Tea, Morphine, etc.

You know all of these throw down the same class of alkaloids in Chemical analysis. They stimulate and then depress. They take from man or woman the power to do his or her best work.

After these people have drugged for a time, they get a hint, or mild "whack," to remind them that they have work to do, a mission to perform, and should be about the business, but are loafing along the wayside and become unfitted for the fame and fortune that waits for them if they but stick to the course and keep the body clear of obstructions so it can carry out the behests of the mind.

Sickness is a call to "come up higher." These hints come in various forms. It may be stomach trouble or bowels, heart, eyes, kidneys or general nervous prostration. You may depend upon it when a "whack" comes it's a warning to quit some abuse and do the right and fair thing with the body.

Perhaps it is coffee drinking that offends. That is one of the greatest causes of human disorder among Americans.

Now, then, if Mother Nature is gentle with you and only gives light little "whacks" at first to attract attention, don't abuse her consideration, or she will soon hit you harder, sure.

And you may also be sure she will hit you very, very hard if you insist on following the way you have been

It seems hard work to give up a habit, and we try all sorts of plans to charge our ill feelings to some other cause than the real one.

Coffee drinkers when ill will attribute the trouble to bad food, malaria, overwork and what not, but they keep on being sick and gradually getting worse, until they are finally forced to quit entirely, even the "only one cup a day." Then they begin to get better, and unless they have gone long enough to set up some fixed organic disease, they generally get entirely

It is easy to quit coffee at once and for all, by having well made Postum, with its rich, deep, seal brown color which comes to the beautiful golden brown when good cream is added, and the crisp snap of good, mild Java is there if the Postum has been boiled long enough to bring it out.

It pays to be well and happy for good old Mother Nature then sends us her blessings of many and various kinds and helps us to gain fame and fortune.

Strip off the handicaps, leave out the deadening habits, heed Mother Nature's hints, quit being a loser and become a winner. She will help you sure if you cut out the things that keep you back.

CIRCUMSTANTIAL EVIDENCE.

Remarkable Coincidence Which Would Have Made a Bad Case for Innocent Man.

"Several years ago I took a late train from Boston to New York," said a man in business in Kansas City, according to the Star. "In the morning I was awakened earlier than usual by the porter, who said that a robbery had been committed on the sleeper during the night and that all the passengers would have to get up. Some one had taken six \$100 bills from the clothing of a gentleman who occupied a berth in the middle of the car. Every section had been taken before he left Boston, and as the train had been almost constantly in motion it seemed certain that the person who had committed the theft was still on the car. The porter said no one had been aboard but the passengers and that none of them had left. It was proposed to search everybody. A man who had a berth directly opposite from the one who had been robbed objected. He told his name and said anyone might easily find that he was a man of good reputation. In the meantime some officers boarded the car and after a little sweating got the money from the colored porter, who was the guilty one. Then the passenger who had refused to be searched asked the officers to examine his pockets. This seemed strange, but h insisted. In an inside pocket they found six \$100 bills. It was merely a coincidence that he should have the same amount of money as the other passenger had lost, and in exactly the same denominations, but he knew that under the circumstances he could hardly establish his innocence. How was that for a case of circumstantial evidence?

Newcomer in Society Who Got Mixed Up with Persons of Title.

Hats for gentlemen are now worn larger. They must be a size larger than formerly, so as to come down farther on the back of the head of the wearer. That is the latest authorized dispensation. On the whole, it is better than the old style of wearing a head too big for one's hat, as the saying goes. It dispenses with the implied swelling.—Boston Herald.

An English writer tells of a poor woman of London who wondered why the Lord permitted her worthless husband to live. "I suppose," she said, "the Lord has an idea that he'll repent, but I know better."
